

Directions

On the print and cut out version, the left is an example and the right invitation is to edit.

If you don't love the font, shop for one to tailor the invitation to your preference.

Once the invitation is perfect, you can copy and paste it to the left side, replacing the example and allowing you to print two invitations per sheet.

Find some paper that you love and print your own invitations.

If your paper has a border or design of any kind, be sure to print one test invitation for spacing and alignment.

Adjust text and spacing as you see fit.
