

Directions

On the version that won't require any cutting, you will find an editable invitation sized to 5-inch x 7-inch.

Find some invitation paper that you love that is already to size and print your own invitations.

If you don't love the font, shop for one to tailor the invitation to your preference.

Once the invitation is perfect, be sure to print one test invitation for spacing and alignment.

If you have a border or design, you may have to adjust the text and spacing as necessary.
